

SECTOR BUNDLE

mediasolam Archives

End-to-end solution for archives, libraries, museums and heritage research centers.

Digitization, AI-driven manuscript transcription, advanced cataloging, METS packaging and unified document management. The full cycle of documentary heritage in one suite.

Why this bundle?

- › HTR of historical manuscripts with era- and script-specific models.
- › Semantic search across the entire collection — find by content, not just metadata.
- › Automated METS XML packaging compliant with international preservation standards.
- › Smart extraction of historical maps, plans and heritage technical documents.

How they work together

Apps share metadata and flow: what you transcribe in Scriptorium becomes queryable in VerbaDoc and is automatically packaged by AnnaMETS for preservation.

1. We scan and transcribe manuscripts with Scriptorium IA, training HTR models per era.
2. VerbaDoc Pro indexes the whole collection and lets you ask questions in natural language.
3. AnnaMETS packages digital objects for long-term preservation and cadex.studio extracts data from plans.

Apps included

Each app solves one piece of the problem. Together they cover the full cycle.

Scriptorium IA CORE APP HTR TRANSCRIPTION

Handwritten text recognition (HTR) with models specialized for historical documents, incunabula and administrative archives of any era.

cadex.studio HERITAGE PLANS

cadex.studio

Information extraction from historical technical plans and maps. Dimensions, legends, tables and automatic geolocation.

AnnaPhoto AI PHOTO ARCHIVE

AI photo archive: B&W colorization, lossless 4K upscaling, visual semantic search.

AnnaMETS METS PACKAGING

Automatic generation of METS XML files compliant with international standards (Library of Congress, PREMIS) for long-term digital preservation.

Annalogica SOUND ARCHIVE

Transcription and analysis of historical sound archives: oral interviews, radio recordings, music collections. Speaker identification and semantic indexing of spoken content.

VerbaDoc Pro DOCUMENT ORCHESTRATION

verbadocpro.eu

AI document orchestration platform. Indexes PDFs, images, audio and transcriptions in a single corpus queryable in natural language.

How to buy the bundle

Single app

RECOMMENDED

Custom configuration

License just one of the apps in the bundle. Ideal for validation before scaling.

Complete bundle

All the apps with preconfigured integration and unified support. Best value for money.

You pick the apps you need and we add specific integrations for your organization.
