

SECTOR BUNDLE

mediasolam Gov

Document and urban transformation for public administrations.

Smart electronic case files, urban planning analysis, plenary transcription and municipal archive. ENS compliance and digital administration regulations.

Why this bundle?

- › Electronic case files queryable in natural language with full traceability.
- › Advanced urban planning and municipal cartography analysis.
- › Automatic transcription and minutes of plenaries, boards and committees.
- › Unified municipal and historical archive with semantic and visual search.

How they work together

The entire municipal document cycle connected: the case file (VerbaDoc), the territory (cadex.studio/pro), the decisions (Annalogica) and the memory (AnnaPhoto).

1. VerbaDoc Pro indexes case files, tenders, resolutions and correspondence for instant citizen and staff access.
2. cadex.studio/pro extracts data from master plans, cadastral maps and urban cartography.
3. Annalogica transcribes plenaries and committees — minutes ready in minutes with speaker identification.

Apps included

Each app solves one piece of the problem. Together they cover the full cycle.
