SECTOR BUNDLE

mediasolam Engineering

Intelligent data extraction from plans, technical documentation and project video.

Automate the analysis of technical plans, extract dimensions and entities, manage project files and analyze audiovisual material from projects.

Why this bundle?

- Technical plan extraction in 30 seconds: dimensions, tables, geolocation and entities.
- Export to 8 formats (PDF, Excel, GeoJSON, DXF, CSV, SVG, TXT, JSON).
- Natural language queries over the entire technical documentation of the project.
- Project video analysis with object detection, metadata and transcription.

How they work together

Plan data (cadex.studio) and textual documentation (VerbaDoc) stay interconnected: query a dimension and jump to the plan and the related specification.

1. cadex.studio extracts data from the project's technical plans — dimensions, legends, entities.
2. VerbaDoc Pro indexes specifications, memos and technical documentation for instant queries.
3. Annalysis Media processes job site videos, drone inspections and technical recordings.

Apps included

Each app solves one piece of the problem. Together they cover the full cycle.

cadex.studio/pro CORE APP PLAN ANALYSIS

cadex.studio/pro

Extracts dimensions, tables, geolocations and entities from any technical plan in 30 seconds. Exports in 8 professional formats.

VerbaDoc Pro TECHNICAL DOCS

verbadocpro.eu

Indexes specifications, memos, reports and technical correspondence. Natural language queries with full traceability to source.

Annalysis Media VIDEO ANALYSIS

Professional AI video analysis: object detection, metadata extraction, transcription and professional-format export.

How to buy the bundle

Single app

License just one of the apps in the bundle. Ideal for validation before scaling.

RECOMMENDED

Complete bundle

All the apps with preconfigured integration and unified support. Best value for money.

Custom configuration

You pick the apps you need and we add specific integrations for your organization.
