

SECTOR BUNDLE

## mediasolam Media

AI for television, radio, production companies and media groups.

Automatic transcription of audiovisual content, intelligent photo archive management and video analysis with object detection. The full ingest and post-production flow powered by AI.

### Why this bundle?

- › Multilingual automatic transcription with subtitles, speaker identification and summaries.
- › Photo archive management with visual and semantic search across millions of images.
- › Video analysis with object detection, metadata extraction and professional export.
- › Integrates with existing ingest and MAM workflows — without breaking what already works.

### How they work together

*The same recorded event is transcribed (Annalogica), its photos are visually indexed (AnnaPhoto) and the video is analyzed with AI (Annalysis Media) — all queryable from a single interface.*

1. Annalogica transcribes all recorded material, generates multilingual subtitles and editorial summaries.
2. AnnaPhoto catalogs the photo archive with visual search and retrieves images by content.
3. Annalysis Media analyzes raw footage, detects people/objects and exports structured metadata.

## Apps included

Each app solves one piece of the problem. Together they cover the full cycle.

### **Annalogica** **CORE APP** TRANSCRIPTION & SUBTITLES

Multilingual automatic transcription (Whisper V3), subtitles, speaker identification, AI summaries and batch processing.

### **AnnaPhoto** PHOTO ARCHIVE

Intelligent photo archive with 4K upscaling, visual content search, automatic cataloging and mobile access.

### **Annalysis Media** VIDEO ANALYSIS

Professional AI video analysis: object detection, metadata extraction, transcription and export in professional formats (JSON, XML, CSV).

## How to buy the bundle

### Single app

License just one of the apps in the bundle. Ideal for validation before scaling.

### RECOMMENDED

### Complete bundle

All the apps with preconfigured integration and unified support. Best value for money.

### Custom configuration

You pick the apps you need and we add specific integrations for your organization.
